

FOR IMMEDIATE RELEASE:

Dynaudio Pro Introduces LYD Nearfield Monitors – The Personal Reference Monitor Redefined.

Toronto Ontario, April 6, 2016 – Brand new from Dynaudio Pro, the LYD Series personal nearfield monitors deliver exceptional precision at reasonable listening levels – making them perfect for home studios and workstations.

LYD Monitors offer producers and musicians nearfield speakers that excel when used in controlled volume listening spaces. Each drive unit is fueled by a powerful, state-of-the-art Class-D amplifier that features a 96kHz/24bit signal path. New softdome tweeters and trademark MSP woofers ensure unerring accuracy.

Innovative DSP control in the Dynaudio LYD Series offers the option to extend or curtail the low frequency response by 10 Hz where needed. Advanced Position and Sound Balance controls ensure the best possible performance in any professional listening environment.

Advanced controls on LYD Monitors' rear panel include **Bass Extension** which allows the user to choose between having the speaker play with a flat default bass setting, or tuned to play as loud as possible (+10Hz/+5dB) or as deep as possible (-10Hz/-5db). None of the three settings influences the linearity of the frequency response.

Knowing that placing a speaker close to a wall is always problematic - and this is especially true of bass-ported systems, LYD Monitors offer two user selectable **Position Settings**, one for free-standing speakers ("Free") and one for speakers placed within 50 cm of a back wall or closer ("Wall").

The **Sound Balance** option is a so-called "tilt filter". Tilt filters lift one end of the frequency spectrum while lowering the other end by the same amount. Different to Shelf-EQs, this can be used to influence the frequency response of the speaker without influencing the phase.

The tilt filter used on the Dynaudio LYD Series lifts 20 kHz by 1.5dB while lowering 20Hz by 1.5dB for a "Bright" setting, or the other way around "Dark" tone shape. This will help to provide a more balanced response at the listening position making LYD monitors the perfect solution for a compact workspace.

Dynaudio Pro LYD Series Monitors are making their debut at this year's Frankfurt MusikMesse Tradeshow, and will be shipping in North America early in the second half of 2016.

LYD-5 - 100w Nearfield Monitor w/5-inch woofer – \$ 559.00 US MAP

LYD-7 - 100w Nearfield Monitor w/7-inch woofer – \$ 669.00 US MAP

LYD-8 - 130w Nearfield Monitor w/8-inch woofer – \$ 789.00 US MAP

DYNAUDIO PRO

Key Features of the LYD Series Nearfield Monitors

- Handcrafted soft-dome tweeter with aluminum voice-coil
- Handcrafted MSP woofer with aluminum voice-coil and die-cast aluminum basket
- Bi-amped speaker design with Class-D amplification
- Bass Extension extends or curtails the low-end frequency response, by changing the low-cut of the monitor
- Position switch between two tuning setups: for freestanding monitors or monitors positioned close to a wall
- Sound Balance to influence the frequency response of the monitor without causing phase problems
- High-Resolution 96kHz/24bit signal path
- Variable input sensitivity
- XLR and RCA inputs for flexible input options
- Made in Denmark

ABOUT YORKVILLE – Yorkville Sound has been a manufacturer of PA systems and loudspeakers, Traynor **instrument amplifiers**, installed audio systems and accessories since its inception in 1963. The company now employs over 200 people in a 150,000 sq ft facility in Pickering Ontario, Canada (a suburb of Toronto).

In addition to its manufacturing capability, Yorkville Sound is an importer and distributor of microphones, and accessories under the **Apex brand** (www.apexelectronics.com) as well as studio effects, signal processors, microphone preamps and accessories under the brand name **Applied Research & Technology** (ART) (www.artproaudio.com) originally based in Rochester New York. Yorkville Sound distributed lines include **Granite Percussion, Denver Guitars, Orion FX Lighting, Dynaudio PRO** and **Hughes & Kettner Amplifiers** for North America; **Epiphone Guitars, Gibson Guitars, Mapex Drums, Los Cabos Drumsticks, Line 6, Rotosound Strings, Dean Markley Strings, Snark Tuners, GoPro Cameras, TrueTone Pedals, Gibson Pro Audio, Cerwin-Vega, Stanton, KRK** as well as **Gallien-Krueger** amplifiers for Canada.

ABOUT DYNAUDIO PRO - Dynaudio was founded in 1977 in Skanderborg, Denmark, and today is recognized as one of the leading manufacturers of high quality loudspeakers and one of the world's most distinguished high end audio companies. In particular, Dynaudio home audio loudspeaker models are recognized for their advanced driver technology which has been designed, engineered and continuously developed completely in-house, and for their furniture-grade, hand-crafted Danish cabinetry. Distributed in over 60 countries around the globe, Dynaudio produces a diverse range of premium loudspeakers for hi-fi and home theater, professional recording studios, automotive and OEM system applications. Dynaudio Professional is regarded as one of the leading professional audio companies, and many of the world's most advanced studios are equipped with Dynaudio monitors, while Dynaudio loudspeakers have been selected as the official reference loudspeaker of the venerable BBC (British Broadcast Company) among others. - **END** -
