

FOR IMMEDIATE RELEASE:

KRK Announces New S-Series Studio Subwoofer Line for 2016.

Toronto Ontario, May 9, 2016 – KRK monitors have been the professional's choice for mixing and mastering for over 25 years. Now you can enhance their natural power with new S-Series 8-inch, 10-inch, and 12-inch powered subwoofers.

Whether you are mixing in a 2.1 or 5.1 surround environment or need to upgrade the low-frequency extension of your existing monitors, the KRK S-Series provides the low frequency detail and accuracy that supports creating a rich, vivid, professional mix.

® KRK S-Series powered studio subwoofers build upon KRK's legacy for sonic accuracy in a compact form factor. The custom-voiced, glass-aramid woofer delivers tight, defined bass, while the Class-D powered Amplifier dramatically increases transient response, control and punch, allowing you to properly engineer the low-frequency portion of the mix.

The four-position selectable crossover lets you adjust the subwoofer setting easily to your existing monitors. Pairing any S-Series subwoofer with KRK or another studio monitor delivers an optimized mixing and listening experience with extended low end. The exclusive bypass-control feature provides full range audio to the monitors if needed, without switching off the subwoofer.

KRK's S-Series subwoofers don't just deliver precise bass and a rich feature set: it's the next dimension in subwoofer performance.

Features of the S Series Line:

- Woven Kevlar Woofers
- Footswitch input enables/disables sub and crossover filter (footswitch not included)
- Curved design with front-firing bass port for placement flexibility
- Powerful, lightweight Class D amplification
- Optimized four-position crossover control
- Universal connectivity: XLR, 1/4" TRS, and RCA inputs and outputs
- Polarity and input sensitivity controls
- All-steel grill and 15 mm reinforced MDF enclosure provide maximum strength and component protection
- Ground lift switch prevents ground loops
