NEWS RELEASE

Yorkville Sound Debuts The Next Generation of Lighting

LP-LED2X

Toronto Ontario – December, 2017 –Yorkville Sound, leading manufacturer and distributor of pro audio systems and musical instruments is excited to announce the next generation of LED lighting, the LP-LED2X.

The improved LP-LED2X has the same innovative specifications as our successful LP-LED4X Light Bar, but with smaller profile to deliver maximum performance in a portable package.

Designed to be the ideal solution for any professional lighting application, the Yorkville Sound LP-LED2X can be easily transported to DJ shows and is capable of lighting a small stage or an entire dancefloor.

Built for easy operation and simple integration, a standalone LP-LED2X will provide ample coverage using its advanced on-board programming and effect banks. Multiple LP-LED2X can be connected and operated in unison with a standard microphone cable and our iOS and Android App, via Bluetooth, controls up to four individual LP-LED2X fixtures.

The low profile design and convenient bar handle make transporting the LP-LED2X effortless. The innovative pole-through technology encourages versatility, allowing multiple units to be used on a standard speaker stand for large scale mobile applications. Contractors and touring companies will appreciate the integrated flypoints that ensure safe installation or truss mounting in touring rigs, club installs or theatre applications.
