SMT Disclaimer

Due to the complex nature of the use of SMT installed components in Yorkville equipment, we highly caution all service technicians in attempting to repair or replace SMT factory installed components.

Many of these components may be glued prior to initial soldering.

Replacing SMT components requires expensive specialized de-soldering equipment and training.

Yorkville Sound will repair and replace defective SMT components to ensure proper quality assurance and installation is maintained.

Quality and Innovation Since 1963
Printed in Canada

IMPORTANT SAFETY INSTRUCTIONS

This lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

Ce symbole d'éclair avec tête de flèche dans un triangle équilatéral est prévu pour alerter l'utilisateur de la présence d'un «voltage dangereux» non-isolé à proximité de l'encointe du produit qui pourrait être d'ampleur suffisante pour présenter un risque de choc électrique.

The DO NOT STACK symbol is intended to alert the user that the product shall not be vertically stacked because of the nature of the product.

La symbole NE PAS EMPILER est pour alerter l'utilisateur que le produit ne doit pas être empilé verticalement en raison de la nature du produit.

SEPARATE COLLECTION WEEE

CAUTION: HOT SURFACE
ATTENTION: SURFACE CHAUDE

CAUTION • AVIS

RISK OF ELECTRIC SHOCK
DO NOT OPEN
RISQUE DE CHOC ELECTRIQUE
NE PAS OUVRIR

DO NOT PUSH OR PULL

NOT TO BE SERVICED BY USERS

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Le point d'exclamation à l'intérieur d'un triangle équilatéral est prévu pour alerter l'utilisateur de la présence d'instructions importantes dans la littérature accompagnant l'appareil en ce qui concerne l'opération et la maintenance de cet appareil.

CAUTION: OVERHEAD LOAD
ATTENTION: CHARGE AÉRIENNE

FOLLOW ALL INSTRUCTIONS

Instructions pertaining to a risk of fire, electric shock, or injury to a person

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK).

NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. THIS DEVICE IS FOR INDOOR USE ONLY!

INSTALLED BATTERY PACKS SHALL NOT BE EXPOSED TO EXCESSIVE HEAT SUCH AS SUNSHINE, FIRE OR THE LIKE.

SUIVEZ TOUTES LES INSTRUCTIONS

Instructions relatives au risque de feu, choc électrique, ou blessures aux personnes

AVIS: AFIN DE RÉDUIRE LES RISQUES DE CHOC ÉLECTRIQUE, N'ENLEVEZ PAS LE COUVERT (OU LE PANNEAU ARRIÈRE) NE CONTIENT AUCUNE PIÈCE RÉPARABLE PAR L'UTILISATEUR. CONSULTEZ UN TECHNICIEN QUALIFIÉ POUR L'ENTRETIEN CE PRODUIT EST POUR L'USAGE À L'INTÉRIEUR SEULEMENT. LES PACKS BATTERIES INSTALLÉS NE DOIVENT PAS ÊTRE EXPOSÉS À UNE CHALEUR EXCESSIVE TELLE QUE LE ENSOLEILLEMENT, LE FEU OU SIMILAIRES.

Read Instructions: The Owner's Manual should be read and understood before operation of your unit. Please, save these instructions for future reference and heed all warnings.

Cleaning: Clean only with dry cloth.

Packaging: Keep the box and packaging materials, in case the unit needs to be returned for service.

Warning: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture. *Do not use this apparatus near water!*

Warning: When using electric products, basic precautions should always be followed, including the following:

Power Sources

Your unit should be connected to a power source only of the voltage specified in the owners manual or as marked on the unit. This unit has a polarized plug. Do not use with an extension cord or receptacle unless the plug can be fully inserted. Precautions should be taken so that the grounding scheme on the unit is not defeated. An apparatus with CLASS I construction shall be connected to a Mains socket outlet with a protective earthing connection. Where the MAINS plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.

Hazards

Do not place this product on an unstable cart, stand, tripod, bracket or table. The product may fall, causing serious personal injury and serious damage to the product. Use only with cart, stand, tripod, bracket, or table recommended by the manufacturer or sold with the product. Follow the manufacturer's instructions when installing the product and use mounting accessories recommended by the manufacturer. Only use attachments/accessories specified by the manufacturer.

Equipment that is suspended overhead must use a secondary safeguard to prevent personal injury in the event the primary mounting mechanism fails. Safety eyebolts attached to the equipment and galvanized steel wire can be used together to implement a failsafe mounting thus ensuring the safety of the equipment and anyone positioned below the equipment.

Improper installation can result in bodily injury or death. If you are not qualified to attempt the installation get help from a professional structural rigger.

Note: Prolonged use of headphones at a high volume may cause health damage to your ears.

The apparatus should not be exposed to dripping or splashing water; no objects filled with liquids should be placed on the apparatus.

Terminals marked with the "lightning bolt" are hazardous live; the external wiring connected to these terminals require installation by an instructed person or the use of ready made leads or cords.

Ensure that proper ventilation is provided around the appliance. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

No naked flame sources, such as lighted candles, should be placed on the apparatus.

Power Cord

Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet. The AC supply cord should be routed so that it is unlikely that it will be damaged.

Protect the power cord from being walked on or pinched particularly at plugs. If the AC supply cord is damaged DO NOT OPERATE THE UNIT. To completely disconnect this apparatus from the AC Mains, disconnect the power supply cord plug from the AC receptacle. The mains plug of the power supply cord shall remain readily operable.

Unplug this apparatus during lightning storms or when unused for long periods of time.

Service

The unit should be serviced only by qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, requires battery pack replacement or has been dropped. Disconnect power before servicing!

Veillez Lire le Manuel! Il contient des informations qui devraient être comprises avant l'opération de votre appareil. Conservez. Gardez S.V.P. ces instructions pour consultations ultérieures et observez tous les avertissements.

Nettoyage: Nettoyez seulement avec le tissu sec.

Emballage: Conservez la boîte au cas où l'appareil devait être retourné pour réparation.

Avertissement: Pour réduire le risque de feu ou la décharge électrique, n'exposez pas cet appareil à la pluie ou à l'humidité. *N'utilisez pas cet appareil près de l'eau!*

Attention: Lors de l'utilisation de produits électrique, assurez-vous d'adhérer à des précautions de bases incluant celle qui suivent:

Alimentation - L'appareil ne doit être branché qu'à une source d'alimentation correspondant au voltage spécifié dans le manuel ou tel qu'indiqué sur l'appareil. Cet appareil est équipé d'une prise d'alimentation polarisée. Ne pas utiliser cet appareil avec un cordon de raccordement à moins qu'il soit possible d'insérer complètement les trois lames. Des précautions doivent être prises afin d'éviter que le système de mise à la terre de l'appareil ne soit désengagé. Un appareil construit selon les normes de CLASS I devrait être raccordé à une prise murale d'alimentation avec connexion intacte de mise à la masse. Lorsqu'une prise de branchement ou un coupleur d'appareils est utilisée comme dispositif de débranchement, ce dispositif de débranchement devra demeurer pleinement fonctionnel avec raccordement à la masse.

Risque - Ne pas placer cet appareil sur un chariot, un support, un trépied ou une table instables. L'appareil pourrait tomber et blesser quelqu'un ou subir des dommages importants. Utilisez seulement un chariot, un support, un trépied ou une table recommandés par le fabricant ou vendus avec le produit. Suivre les instructions du fabricant pour installer l'appareil et utiliser les accessoires recommandés par le fabricant. Utilisez seulement les attachements/accessoires indiqués par le fabricant.

L'équipement suspendu au-dessus de la tête doit utiliser une protection secondaire pour éviter les blessures en cas de défaillance du mécanisme de montage principal. Les boulons à œil de sécurité fixés à l'équipement et le fil d'acier galvanisé peuvent être utilisés ensemble pour mettre en œuvre un montage à sécurité intégrée, assurant ainsi la sécurité de l'équipement et de toute personne placée sous l'équipement.

Une installation incorrecte peut entraîner des blessures corporelles ou la mort. Si vous n'êtes pas qualifié pour tenter l'installation, demandez l'aide d'un gréer structurel professionnel.

Remarque : L'utilisation prolongée d'écouteurs à un volume élevé peut nuire à la santé de vos oreilles.

Il convient de ne pas placer sur l'appareil de sources de flammes nues, telles que des bougies allumées.

L'appareil ne doit pas être exposé à des égouttements d'eau ou des éclaboussures et qu'aucun objet rempli de liquide tel que des vases ne doit être placé sur l'appareil.

Assurez que l'appareil est fourni de la propre ventilation. Ne procédez pas à l'installation près de source de chaleur tels que radiateurs, registre de chaleur, fours ou autres appareils (incluant les amplificateurs) qui produisent de la chaleur.

Les dispositifs marqués d'un symbole "d'éclair" sont des parties dangereuses au toucher et que les câbles extérieurs connectés à ces dispositifs de connexion extérieure doivent être effectués par un opérateur formé ou en utilisant des cordons déjà préparés.

Cordon d'Alimentation - Ne pas enlever le dispositif de sécurité sur la prise polarisée ou la prise avec tige de mise à la masse du cordon d'alimentation. Une prise polarisée dispose de deux lames dont une plus large que l'autre. Une prise avec tige de mise à la masse dispose de deux lames en plus d'une troisième tige qui connecte à la masse. La lame plus large ou la tige de mise à la masse est prévu pour votre sécurité. La prise murale est désuète si elle n'est pas conçue pour accepter ce type de prise avec dispositif de sécurité. Dans ce cas, contactez un électricien pour faire remplacer la prise murale. Évitez d'endommager le cordon d'alimentation. Protégez le cordon d'alimentation. Assurez-vous qu'on ne marche pas dessus et qu'on ne le pince pas en particulier aux prises. N'UTILISEZ PAS L'APPAREIL si le cordon d'alimentation est endommagé. Pour débrancher complètement cet appareil de l'alimentation CA principale, déconnectez le cordon d'alimentation de la prise d'alimentation murale. Le cordon d'alimentation du bloc d'alimentation de l'appareil doit demeurer pleinement fonctionnel.

Débranchez cet appareil durant les orages ou si inutilisé pendant de longues périodes.

Service - L'appareil ne doit être entretenu que par un personnel de service qualifié. Une réparation est nécessaire lorsque l'appareil a été endommagé de quelque manière que ce soit, comme le cordon d'alimentation ou la fiche est endommagé, du liquide a été renversé ou des objets sont tombés dans l'appareil, l'appareil a été exposé à la pluie ou à l'humidité, ne fonctionne pas normalement, nécessite le remplacement de la batterie et est tombé. Débranchez l'alimentation avant l'entretien!

IMPORTANT SAFETY INSTRUCTIONS

The Lightning Flash with arrowhead symbol within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product enclosure that may be of sufficient magnitude to constitute a risk of shock to persons

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prongs are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

WARNING:

• To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture and objects filled with liquids, such as vases, should not be placed on this apparatus.

• To completely disconnect this apparatus from the ac mains, disconnect the power supply cord plug from the ac receptacle.

• The mains plug of the power supply cord or appliance coupler shall remain readily accessible.

Le symbole représentant un éclair avec une flèche à l'intérieur d'un triangle équilatéral est utilisé pour prévenir l'utilisateur de la présence d'une tension électrique dangereuse non isolée à l'intérieur de l'appareil. Cette tension est d'un niveau suffisamment élevé pour représenter un risque d'électrocution

Le symbole représentant un point d'exclamation à l'intérieur d'un triangle équilatéral, signale à l'utilisateur la présence d'instructions importantes relatives au fonctionnement et à l'entretien de l'appareil dans cette notice d'installation

1. Lisez ces instructions.
2. Conservez ces instructions.
3. Respecter tous les avertissements.
4. Suivez toutes les instructions.
5. N'utilisez pas l'appareil près de l'eau.
6. Nettoyer uniquement avec chiffon sec.
7. Ne bloquez pas les ouvertures de ventilation. Installer en suivant les instructions du fabricant.
8. Ne pas installer près des sources de chaleur telles que radiateurs, bouches de chaleur, four ou autres appareils (y compris les amplificateurs) produisant de la chaleur.
9. N'annulez pas l'objectif sécuritaire de la fiche polarisée ou de la tige de mise à la terre. Une fiche polarisée possède deux lames avec une plus large que l'autre. Une prise avec mise à la terre possède deux lames et une troisième tige. La lame large ou la troisième tige sont fournis pour votre sécurité. Si la fiche rentre pas dans votre prise, consultez un électricien pour remplacer la prise obsolète.
10. Protéger le cordon d'alimentation des piétinements ou pincements en particulier près des fiches, des prises de courant et au point de sortie de l'appareil.
11. Utilisez uniquement les accessoires spécifiés par le fabricant.
12. Utilisez uniquement avec un charriot, stand, trépied ou une table spécifiée par le fabricant, ou vendus avec l'appareil.
13. Débranchez l'appareil durant un orage ou lorsqu'il reste inutilisé pendant de longues périodes de temps.
14. Confiez toute réparation à un technicien qualifié. Une réparation est nécessaire lorsque l'appareil a été endommagé de quelque façon que ce soit, comme lorsque le cordon d'alimentation ou la fiche est endommagé, lorsque du liquide a été renversé ou des objets sont tombés à l'intérieur, lorsque l'appareil a été exposé à la pluie ou l'humidité, ne fonctionne pas normalement, ou est tombé.

AVERTISSEMENT:

• Pour réduire les risques d'incendie ou de choc électrique, ne pas exposer cet appareil à la pluie ou à l'humidité et ne placez pas d'objets contenant des liquides, tels que des vases, sur l'appareil.

• Pour isoler totalement cet appareil de l'alimentation secteur, débranchez totalement son cordon d'alimentation du réceptacle CA.

• La prise du cordon d'alimentation ou du prolongateur, si vous en utilisez un comme dispositif de débranchement, doit rester facilement accessible

CAUTION
TO PREVENT ELECTRIC SHOCK HAZARD,
DO NOT CONNECT TO MAINS POWER SUPPLY
WHILE GRILLE IS REMOVED.

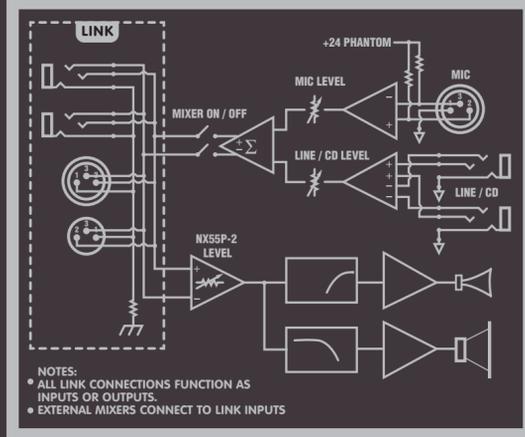

AVIS
POUR PRÉVENIR LES RISQUES D'ÉLECTROCUTION,
NE PAS RACCORDER À L'ALIMENTATION ÉLECTRIQUE ALORS
QUE LA GRILLE EST RETIRÉE.

Specifications

System Type	2-Way
Active or Passive	Active
Program Power (watts)	1000 (2000 Peak)
Biampable	Self Powered
Biamp Operation Only	Yes
Max SPL (dB)	128 (134 Peak)
Frequency Response (Hz +/- 3db)	45 - 18k
Crossover Frequency (Hz)	2300
Driver Configuration	12 inch / 1 inch
HF Driver(s)	1.4-inch Aluminum Diaphragm w/ 1-inch exit
HF Program Power (Watts)	100
HF Dispersion (°H x °V)	80 x 50
LF Driver(s)	12-inch w/ 3-inch voicecoil
LF Program Power(Watts)	900
HF Amplifier Type	Two Tier Class H
LF Amplifier Type	Class D
Power Cable	Yes
Power Switch	Yes
Inputs	7
Inputs - 1/4-inch Jacks	2 (line input) 2 (link in/out)
Inputs - XLR	1 (mic) 2 (line in/out)
Input Sensitivity (Vrms Sine)	+4dBv / 1.23V
Mixer Controls	Mixer on/off switch Mic Gain Line/CD Gain Treble/Bass Tweak
Level Controls	+/- 6dB Main Volume
EQ Controls	100Hz HP Filter (LF Rolloff)
Limiter	Yes
LED Indicators	Power/Clip/Limit
Feet	Yes
Flying Hardware	2 (Top), 2 (Bottom), 1 (Pullback)
Optional Flying Hardware	NX Flyware
Bar Handles	1 (Side)
Pole Mount Adapter (1 3/8"-3.5cm)	Yes
Enclosure Materials	Injection molded Polypropylene
Grille	Perforated Metal
Dimensions (DWH xbackW, inches)	12.25 x 16 x 26.5 x 9
Dimensions (DWH xbackW, cm)	31.12 x 40.6 x 67.3 x 22.9
Weight (lbs/kg)	41 / 18.6

Spécifications

Type De Système	2-Voies
Active ou Passive	Active
Puissance nominale (Watts)	1000 (2000 Peak)
Double Amplificateurs	Autoalimenté
Opération à double amplificateur seulement	Oui
Pression sonore Maximum (dB)	128 (134 Peak)
Réponse en Fréquence (Hz +/- 3db)	45 - 18k
Fréquence de croisement (Hz)	2300
Configuration De Haut-Parleurs	12 pouces / 1 pouce
Driver pour fréquences Aiguës(s)	1.4-pouces en aluminium à membrane avec la sortie de 1 pouce
Puissance nominale pour fréquences Aiguës(Watts)	100
Dispersion des Aiguës(°H x °V)	80 x 50
Driver pour fréquences Grave (s)	12 pouces avec aimant Néodymium et bobine mobile de 3 pouces
Puissance nominale pour fréquences Graves (Watts)	900
Type D'Amplificateur pour Fréquences Aiguës	Deux Rangés Class H
Type D'Amplificateur pour Fréquences Graves	Class D
Cordon D'alimentation	Oui
Commutateur de mise en marche	Oui
Entrées	7
Entrées- 1/4-po Jacks	2 (entrée ligne) 2 (connexion entrée/sortie)
Entrées- XLR	1 (mic) 2 (ligne entrée/sortie)

PCB ASSEMBLY DOCUMENTATION

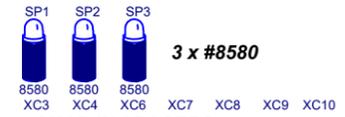

SPECIAL PRODUCTION NOTES

1. PCBSA: ADD RTV BETWEEN C63 AND C123 AS SHOWN HERE.
2. PCBSA: U4 IS HAND INSERTED.
3. LEADS FOR 5 WATT RESISTORS MUST BE BENT ON THE MACHINE
LEAD LOOP MUST NOT BE ABOVE TOP OF RESISTOR
4. FIT #8921 FLAT WASHER BETWEEN #3501 BELL WASHER AND #8667 SHOULDER WASHER FOR Q2, Q10, U30 AND U31
5. PCBSA: ENSURE THAT #5862 CAP LEADS ARE PROPERLY INSERTED (DO NOT PUT LEADS INTO RTV HOLES!)
6. ADD AMPLE RTV UNDER ENTIRE BASE OF OUTPUT COIL L1
7. MOUNT Q14 AND Q15 ON #4181 CERAMIC INSULATORS WITH GOOP IN BETWEEN.
8. ADD #8580 SPACERS TO LEADS L2, L3 AND L4
9. BEND ONLY IN DIRECTION SHOWN & ADD RTV

3. Use pin cutter to separate boards from panel

THIS SHEET CONTAINS SPECIAL PRODUCTION NOTES AND A LIST OF PCB HARDWARE PARTS REQUIRED FOR THE BUILD.

Section: Assembly Documentation			
Product(s): NX55P-2			
PCB#: M1557	Rev#: V03	En : T. Wood	Sheet 6 Of 7
Modified: 2022-11-03	File: Assembly.SchDoc		

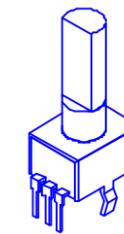

DESIGN HISTORY AND INFORMATION

CHANGE HISTORY

#	DATE	VER#	PC#	DESCRIPTION OF CHANGE
1	2018-10-30	V01	9145	New SMT version from the input section of M1555
2	2019-01-14	V01	9337	Remove R240 and replace attributes with Do Not Stuff (DNS)
3	.	.	.	Replace R81 from 10 0 to 4 99 YS#7679
4	.	.	.	Replace R66 from 27 4 to 13 YS#7627
5	.	.	.	Replace R136 from 2 21 to 681R YS#7646
6	.	.	.	Remove D65
7	2019-03-19	V01	9350	Added D65 bac . Connected D14 cathode to D65 cathode in both schematic & PCB.
8	2019-03-22	V02	.	Released V02
9	2022-11-02	V03	9838	Updated footprints of pots and switches for improved manufacturing

SPECIAL PRODUCTION NOTES

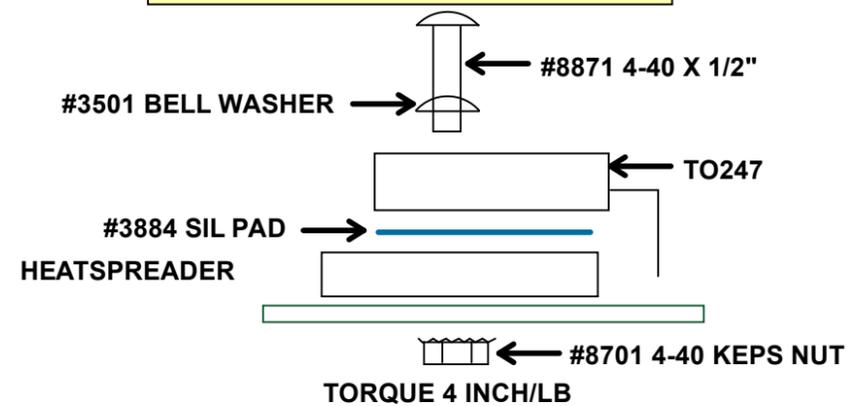

1. ADD RTV BETWEEN C63 AND C123 AS SHOWN HERE. 
2. FIT #8921 FLAT WASHER BETWEEN #3501 BELL WASHER AND #8667 SHOULDER WASHER FOR Q2, Q10, U30 AND U31
3. ENSURE THAT #5862 CAP LEADS ARE PROPERLY INSERTED (DO NOT PUT LEADS INTO RTV HOLES!)
4. ADD AMPLE RTV UNDER ENTIRE BASE OF OUTPUT COIL L1
5. MOUNT Q14 AND Q15 ON #4181 CERAMIC INSULATORS WITH GOOP IN BETWEEN AND ALSO GOOP IN ON BOTH SIDES OF SILPAD 3884. TO BE APPLIED AS THIN AS POSSIBLE.

Power, Limit and Clip LED - The Power LED illuminates green when power is on, the yellow when operating at full power and the limiters are functioning and the Clip LED illuminates when the signal is too strong (adjustment is needed to either the input's signal or the input level control).

Level Control - Allows the audio level of the cabinets, linked in a chain, to be individually adjusted. It does not adjust the level of the Link jacks. Set at '0' (center) for most applications.

LF Rolloff - For use with a subwoofer, the LF Rolloff shuts off the low frequency boost and filters out signals below 100 Hz. This only affects the signals to the internal amplifier and does not affect signals going out from the internal mixer, or to signals passing through the Link connections.

Mixer On/Off - This switch turns the NX55P Series Two's internal mixer on and off, the LINK jacks still function.

**Note: these units have been designed to interconnect multiple NX55P Series Two cabinets (up to 12+) via the Link. When linking a maximum of 3 internal mixers can be used (activated).*

Mic Input/Level - Connect a regular mic into the Mic input and use the control to adjust the level. Phantom power is built-in for condenser microphones.

Line/CD inputs - These 1/4-inch inputs allow line-level sources such as smartphones or other sources such as mixers to be connected, use the control to adjust the level.

If both inputs are used the signals will be blended into mono. The inputs are balanced and unbalanced 1/4-inch plugs can be used.

S E R I E S T W O

nx55^P

1000 WATT POWERED LOUDSPEAKER ENCLOSURE

Treble and Bass Controls - These controls affect the signals from devices plugged into the Line/CD and Mic inputs. The signal through the Link will also be affected. These controls do not affect signals coming into the cabinet from the Link connections.

Link - These parallel jacks allow multiple NX55P Series Two cabinets to be connected together. The Link Jacks are the correct input to use when driving the NX55P Series Two from an external mixer.

Power Switch - This turns the power On and Off to the cabinet.

Note; a cabinet that is one of the cabinets in a chain, but turned off might cause hum (or buzz) in the other cabinets.

Fuse - The mains fuse should never blow even in extreme operating conditions. A blown fuse will generally mean that excessive mains voltage has been applied or there's a serious fault with the unit. Self resetting thermal switches are built into the power transformer as well

as the internal heat sink. These will not trip even under the most extreme operating conditions and are provided only for safety reasons.

Unbalanced operation: When connecting an unbalanced source (such as a mixer with RCA outputs) to balanced inputs such as an NX55P Series Two, the best hum rejection can be achieved by running a balanced connection right to the unbalanced plug. The return connection should be connected to ground at the unbalanced plug. The NX55P Series Two does not connect the AC power ground directly to the input signal ground. This will eliminate most ground problems.

QuickStart-NX55P-2-REV2-00-1v1 • YS#QSTART-NX55P2 • January 22, 2020

DEL d'Alimentation, Limit et Clip -

La DEL d'alimentation s'allume en vert lorsque l'appareil est sous tension, en jaune lorsque l'appareil fonctionne à plein régime et que les limiteurs sont activés et la DEL Clip s'allume lorsque le signal est trop fort (un réglage de niveau est nécessaire soit du signal d'entrée ou à l'aide de la commande de niveau d'entrée).

Level Control (Commande de Niveau) - Permet de régler individuellement le niveau audio des enceintes, liées dans une chaîne. Il ne règle pas le niveau des prises Link. Réglez sur '0' (centre) pour la plupart des applications.

LF Rolloff (Pente d'Atténuation des Fréquences Graves) - Pour une utilisation avec un caisson de grave, le filtre LF Rolloff désactive l'amplification des basses fréquences et filtre les signaux inférieurs à 100 Hz. Cela affecte uniquement les signaux envoyés à l'amplificateur interne et n'affecte pas les signaux sortants du mélangeur interne, ni ceux passant par les connexions Link.

Mixer On/Off - Ce commutateur allume et éteint le mélangeur interne du NX55P-2. Les prises LINK continuent de fonctionner.

** Remarque: ces unités ont été conçues pour interconnecter plusieurs enceintes NX55P-2 (jusqu'à 12+) via la prise Link. Lors de la liaison, vous pouvez utiliser (activé) au maximum 3 mélangeurs internes.*

Mic Input/Level (Entrée/Niveau) - Connectez un micro ordinaire à l'entrée Mic et utilisez la commande pour régler le niveau. L'alimentation fantôme est intégrée pour les microphones à condensateur.

Line/CD Inputs (Entrées Ligne/CD) - Ces entrées 1/4 de pouce permettent de connecter des sources de niveau ligne telles que des smartphones ou d'autres sources telles que des consoles de mixage. Utilisez la commande pour régler le niveau.

Si les deux entrées sont utilisées, les signaux seront mélangés en mono. Les entrées sont symétriques et des fiches asymétriques de 1/4 de pouce peuvent être utilisées.

Pour obtenir le manuel de utilisateur visitez notre site Web à <http://www.yorkville.com/manuals/> ou, si vous avez besoin d'une version imprimée appelez-nous au 905-837-8777

1000 WATT POWERED LOUDSPEAKER ENCLOSURE

Commandes Treble et Bass -

Ces commandes affectent les signaux des périphériques connectés aux entrées Line / CD et Mic. Le signal à travers le lien Link sera également affecté. Ces commandes n'affectent pas les signaux qui entrent dans l'enceinte à partir des connexions Link.

Link - Ces prises parallèles permettent de connecter plusieurs enceintes NX55P-2. Les prises Link constituent l'entrée appropriée à utiliser lors de l'utilisation du NX55P-2 à partir d'un mélangeur externe.

Power Switch (Interrupteur d'Alimentation) - Cet interrupteur allume et éteint l'enceinte.

Remarque; une enceinte qui fait partie d'une chaîne d'enceintes, mais qui est éteinte peut provoquer un bourdonnement dans les autres enceintes.

Fuse (Fusible) - Le fusible ne devrait jamais griller, même dans des conditions de fonctionnement extrêmes. Un fusible grillé signifie généralement qu'une tension

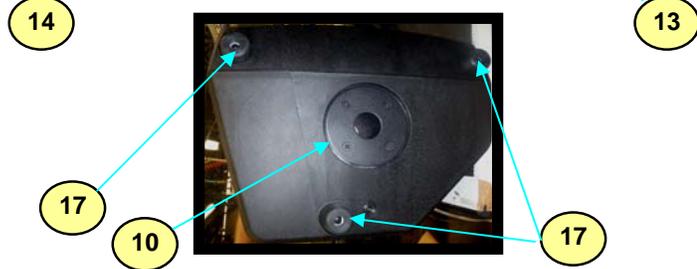

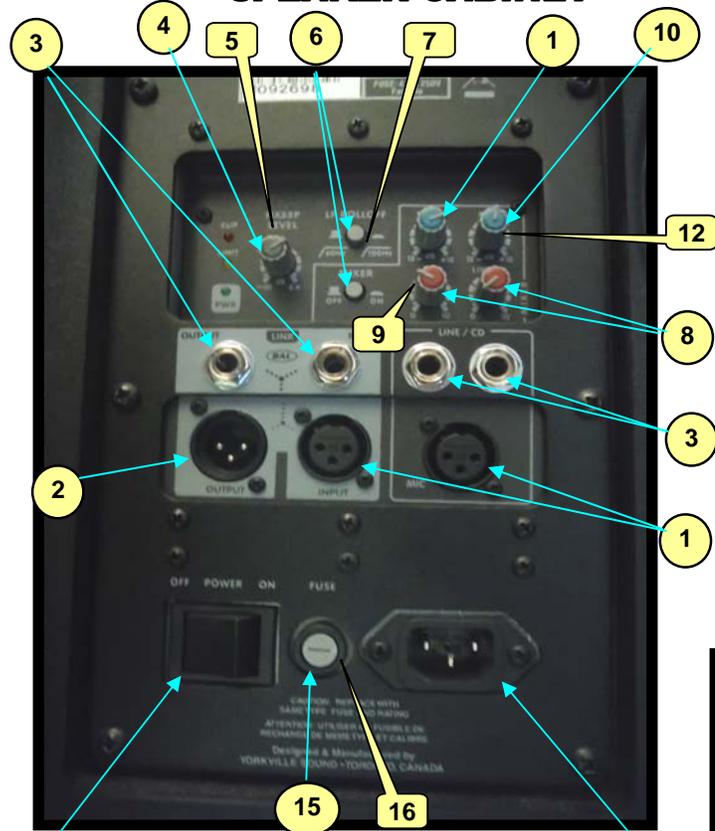

secteur excessive a été appliquée ou que l'appareil présente un défaut grave. Des interrupteurs thermiques à réarmement automatique sont intégrés au transformateur de puissance et au dissipateur de chaleur interne. Ceux-ci ne se déclencheront pas même dans les conditions de fonctionnement les plus extrêmes et sont fournis uniquement pour des raisons de sécurité.

Fonctionnement asymétrique: lors du raccordement d'une source asymétrique (telle qu'un mélangeur avec sorties RCA) à des entrées symétriques telles sur un NX55P-2, il est possible d'obtenir une réjection optimale du bourdonnement en établissant une connexion symétrique jusqu'à la fiche asymétrique. La connexion de retour doit être connectée à la terre au niveau de la fiche asymétrique. Le NX55P-2 ne connecte pas la masse de l'alimentation secteur directement à la masse du signal d'entrée. Cela éliminera la plupart des problèmes de mise à la masse.
