

YXL Tower10

Column PA with 10" Subwoofer

Overview

The new YXL Tower10 is Yorkville Sound's most affordable column PA system with a 10" subwoofer. They're ideal for musicians and presenters who need portable sound reinforcement for smaller venues, and multiple units can be linked for larger applications.

The YXL Tower10 delivers 1550 watts of peak power between the high-frequency compression driver, four 3" midrange drivers and subwoofer. It also features an integrated mixer, three voicing modes, and Bluetooth connectivity including wireless stereo playback between two systems.

Up to sixteen YXL towers can be linked together, and up to three onboard mixers can be active within a linked system.

The speaker bar can be mounted directly into the subwoofer or placed on top of the included extension column. A gig bag and subwoofer cover are included for easy transport.

Features

- 1550 Watts Peak Power (1250 Subwoofer, 300 Mid / High)
- 124 dB Peak SPL (116 Continuous)
- Neodymium Drivers: 10" Subwoofer, 4x 3" Midrange, 3/4" HF
- Bluetooth Receiver with Wireless Stereo Playback Support
- Onboard 3-Channel Mixer
- Concert, Club, and Speech Modes
- Gig Bag Included
